Introduction

The **Avec Inventory Tracker** is a command-line application designed to help you manage inventory items, events, containers, and users efficiently. The program allows you to:

- Add, edit, and delete events.
 - Manage inventory items (assets) and their maintenance logs.
 - Create and manage containers that hold multiple assets.
 - Add and manage users with different access levels.
 - Keep track of logs for auditing purposes.
-

Getting Started

Installation

1. Prerequisites:

- Python 3.x installed on your system.
- Basic understanding of using the command line.

2. Download the Program:

Save the provided `inventory_management.py` script to a directory of your choice.

First-Time Setup

When you run the program for the first time, it will prompt you to specify a data folder where all the `.csv` data files will be stored.

Prompt:

```
Please specify the data folder path:
```

- **Action:** Enter the full path to the folder you want to use for storing data files.
- **Example:** `/Users/username/Documents/InventoryData`

If the folder doesn't exist, create it before running the program.

Authentication

Upon starting the program, you will be greeted with a login prompt.

Prompts:

```
Welcome to Avec Inventory Tracker.  
Username:  
Password:
```

- **Default Admin Credentials (if running for the first time):**
 - **Username:** `admin`
 - **Password:** `admin`

Main Menu

After successful authentication, the main menu will be displayed.

Prompt:

```
Welcome to Avec Inventory Tracker. What would you like to do?  
1. Add  
2. List  
3. Edit <Event number>  
4. History <Asset ID OR S/N>  
5. Delete <Event number>  
6. Find <Event keyword>  
7. View <Event number>  
8. Log  
9. Maintain <Asset ID OR S/N>  
10. exit
```

Available Commands:

- **Add:** Create a new event.
- **List:** Display a list of existing events.
- **Edit :** Edit an existing event by its ID.
- **History <Asset ID OR S/N>:** View the history of a specific asset.
- **Delete :** Delete an event by its ID.
- **Find :** Search for events by keyword.
- **View :** View details of an event by its ID.
- **Log:** Display the system logs.
- **Maintain <Asset ID OR S/N>:** Add a maintenance log to an asset.
- **exit:** Exit the application.

Note: If you are an admin, you can access the configuration menu by typing `config`.

Event Management

Add Event

To add a new event:

1. Select Add:

Type `1` or `add` at the main menu prompt.

2. Provide Event Details:

Prompts:

```
What is the name of the show?  
When is the show (in YYYYMMDD)?
```

- **Name:** Enter the event name.
- **Date:** Enter the event date in `YYYYMMDD` format.

3. Add Assets to Event:

Prompt:

```
Start adding items (type 'done' to finish, 'undo' to remove last item, 'remove <Asset  
ID or Serial Number>' to remove specific item):  
Enter Asset ID or Serial Number or Command:
```

- Enter the **Asset ID** or **Serial Number** of the item to add.
- **Commands:**
 - `done`: Finish adding items.
 - `undo`: Remove the last added item.
 - `remove <Asset ID or Serial Number>`: Remove a specific item.

4. Feedback:

After each entry, the program will provide feedback:

◦ Success:

```
Added [Brand] [Model Number] [Description]
```

◦ Error:

```
Asset ID or Serial Number or Container ID not found.
```

5. Finalize Event:

After typing `done`, the event summary will be displayed.

Example Summary:

```
[20240925] Conference
```

```
Item Summary:
```

```
[AX] 2x Shure ULXD2 Handheld Microphone
```

```
[LX] 1x ETC Source Four LED
```

List Events

To list existing events:

1. Select List:

Type `2` or `list` at the main menu prompt.

2. Events Displayed:

Events are displayed in pages of 10.

Example Output:

```
Event ID: 1 | [20240925] Conference
Event ID: 2 | [20241015] Annual Meeting
```

3. Pagination Prompt:

If there are more events:

```
Show more? (y/n):
```

- Type `y` to display the next page.
- Type `n` to return to the main menu.

Edit Event

To edit an existing event:

1. Select Edit:

Type `3 <Event ID>` or `edit <Event ID>` at the main menu prompt.

Example:

```
edit 1
```

2. Edit Event Details:

Prompts:

```
Editing Event 1: [20240925] Conference
Name [Conference]:
Date [20240925]:
```

- Press **Enter** to keep the current value or enter a new one.

3. Edit Event Assets:

Prompt:

```
Editing items (type 'done' to finish, 'remove <Asset ID or Serial Number>' to remove
specific item):
Enter Asset ID or Serial Number or Command:
```

- Add or remove assets as needed using the same commands as in the **Add Event** section.

4. Finalize Edits:

Type `done` when finished.

Delete Event

To delete an event:

1. Select Delete:

Type `5 <Event ID>` or `delete <Event ID>` at the main menu prompt.

Example:

```
delete 1
```

2. Confirmation Prompt:

```
Confirm delete of [20240925] Conference? (Yes/No):
```

- Type `yes` to confirm deletion.
- Type `No` to cancel.

3. Feedback:

```
Event deleted.
```

Find Event

To find events by keyword:

1. Select Find:

Type `6 <Event keyword>` or `find <Event keyword>` at the main menu prompt.

Example:

```
find Conference
```

2. Results Displayed:

```
Event ID: 1 | [20240925] Conference
```

View Event

To view an event's details:

1. Select View:

Type `7 <Event ID>` or `view <Event ID>` at the main menu prompt.

Example:

```
view 1
```

2. Event Summary Displayed:

```
[20240925] Conference
Item Summary:

[AX] 2x Shure ULXD2 Handheld Microphone
[LX] 1x ETC Source Four LED
```

Asset Management

Add Equipment/Assets

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Add Equipment/Assets:

Prompt:

```
Configuration Menu:
1. Add Equipment/Assets
...
Select an option:
```

Type `1`.

3. Provide Asset Details:

Prompts:

```
Brand (type 'exit' to return):  
Model number:  
Description (optional):  
Department code (e.g., AX, LX):  
How many items to add:
```

- **Brand:** Enter the manufacturer name or type `exit` to return to the previous menu.
- **Model Number:** Enter the model number.
- **Description:** Enter a description (optional).
- **Department Code:** Enter the department code (e.g., `AX` for Audio).
- **Quantity:** Enter the number of items to add.

4. Enter Serial Numbers and Missing Status:

For each item:

Prompts:

```
Serial number for [Asset ID] (optional):  
Is [Asset ID] missing? (y/n):
```

- **Serial Number:** Enter the serial number (optional).
- **Missing Status:** Type `y` if the item is missing, `n` otherwise.

5. Feedback:

```
Added [Quantity] items.
```

Edit Equipment/Assets

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Edit Equipment/Assets:

Prompt:

```
Configuration Menu:  
...  
3. Edit Equipment/Assets  
...  
Select an option:
```

Type `3`.

3. Provide Asset ID:

Prompt:

```
Asset ID to edit:
```

4. Edit Asset Details:

Prompts:

```
Editing [Asset ID]: [Brand] [Model Number] [Description]
Brand [Current Brand]:
Model number [Current Model Number]:
Description [Current Description]:
Serial number [Current Serial Number]:
Department code [Current Department Code]:
Is missing? (y/n):
```

- Enter new values or press **Enter** to keep current values.

5. Feedback:

```
Item updated.
```

Delete Asset or Container

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Delete Asset or Container:

Prompt:

```
Configuration Menu:
...
5. Delete Asset or Container
...
Select an option:
```

Type `5`.

3. Choose to Delete Asset or Container:

Prompt:

```
Delete (1) Asset or (2) Container?
```

- Type `1` for Asset or `2` for Container.

4. Provide ID to Delete:

For Asset:

Asset ID to delete:

For Container:

Container ID to delete:

5. Confirmation Prompt:

Confirm delete of [Asset ID/Container ID]? (y/n):

6. Feedback:

Asset deleted.

or

Container deleted.

Find Asset

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Find Asset:

Prompt:

```
Configuration Menu:
...
4. Find Asset
...
Select an option:
```

Type `4`.

3. Enter Search Keyword:

Prompt:

Enter keyword to search:

4. Results Displayed:

```
[Asset ID]: [Brand] [Model Number] [Description]
```

View Asset History

1. Select History:

Type `4 <Asset ID or Serial Number>` Or `history <Asset ID or Serial Number>` at the main menu prompt.

Example:

```
history ULXD2#01
```

2. History Displayed:

```
History for ULXD2#01: Shure ULXD2 Handheld Microphone
```

```
Maintenance Logs:
```

```
[Date] [Username] [Log Entry]
```

```
Events:
```

```
[20240925] Conference
```

```
[20241015] Annual Meeting
```

Maintain Asset

1. Select Maintain:

Type `9 <Asset ID or Serial Number>` Or `maintain <Asset ID or Serial Number>` at the main menu prompt.

Example:

```
maintain ULXD2#01
```

2. Enter Maintenance Log:

Prompt:

```
Input log:
```

3. Feedback:

```
Maintenance logged.
```

```
[Timestamp] [Username] [Log Entry]
```

Container Management

Add/Edit Container

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Add/Edit Container:

Prompt:

```
Configuration Menu:
2. Add/Edit Container
...
Select an option:
```

Type `2`.

3. Provide Container ID:

Prompt:

```
Container ID:
```

- If the container exists, you'll be editing it.
- If not, a new container will be created.

4. Add or Remove Assets:

Prompt:

```
Enter Asset ID or Serial Number to add (type 'done' to finish):
```

- **Add Assets:** Enter the Asset ID or Serial Number.
- **Remove Assets:** Type `remove <Asset ID or Serial Number>`.

5. Feedback:

- **Adding Asset:**

```
Added [Asset ID] to container.
```

- **Removing Asset:**

```
Removed [Asset ID] from container.
```

User Management

Add/Edit User

Admin access required.

1. Access Configuration Menu:

Type `config` at the main menu prompt.

2. Select Add/Edit User:

Prompt:

```
Configuration Menu:
...
6. Add/Edit User
...
Select an option:
```

Type `6`.

3. Provide Username:

Prompt:

```
Enter username:
```

4. Add or Edit User:

- If the user exists, you'll edit their details.
- If not, a new user will be created.

5. Provide User Details:

For Existing User:

```
Editing existing user.
Enter new password (leave blank to keep current):
Is admin? (y/n):
```

For New User:

```
Creating new user.
Enter password:
Is admin? (y/n):
```

6. Feedback:

- **User Updated:**

```
User updated.
```

- **User Created:**

User created.

Logs

To view system logs:

1. **Select Log:**

Type `8` or `log` at the main menu prompt.

2. **Logs Displayed:**

```
[Timestamp] [Username] [Action]
```

Configuration Menu

Admin access required.

To access the configuration menu:

1. **Type `config` at the main menu prompt.**

2. **Configuration Options:**

```
Configuration Menu:
1. Add Equipment/Assets
2. Add/Edit Container
3. Edit Equipment/Assets
4. Find Asset
5. Delete Asset or Container
6. Add/Edit User
7. View Asset History
8. Maintain Asset
9. Back to Main Menu
Select an option:
```

3. **Select the desired option by typing the corresponding number.**

Exiting the Program

To exit the application:

- Type `10` or `exit` at the main menu prompt.

Prompt:

```
Goodbye!
```

Troubleshooting

- **Data Folder Missing:**

If you move or delete the data folder, the program will prompt you to specify the new location.

Prompt:

```
Data folder not found or inaccessible.  
Please specify the data folder path:
```

- **Invalid Commands:**

If you enter an invalid command, the program will notify you.

Prompt:

```
Invalid option.
```

- **File Not Found Errors:**

Ensure that all required files are present in the data folder. The program will attempt to create missing files automatically.

FAQs

Q: *I forgot my admin password. How can I reset it?*

A: If you have access to the `Users.csv` file, you can manually reset the password by editing the file or deleting it to allow the program to recreate it with the default admin user.

Q: *Can I import existing inventory data into the program?*

A: Yes, you can populate the `Inventory.csv` file with your existing data, ensuring it follows the correct format.

Q: *How do I backup my data?*

A: Regularly copy the data folder to a secure location to back up your data.
